TAB Battery Replacement Tool

Getting Started Guide

INTRODUCTION

Please read this information carefully before using your new Battery Replacement Tool

Thank you for purchasing your Battery Replacement Tool. We at TAB Batteries believe that you will have many years of successful business as a result of your investment and it is our aim to ensure that you will remain as up-to-date as possible.

Always ensure you have the latest version of software and vehicle data that is available. Follow the instructions for **Software Update** procedure.

Please refer to this manual when using the tool and don't hesitate to contact your distributor if you experience any difficulty with it.
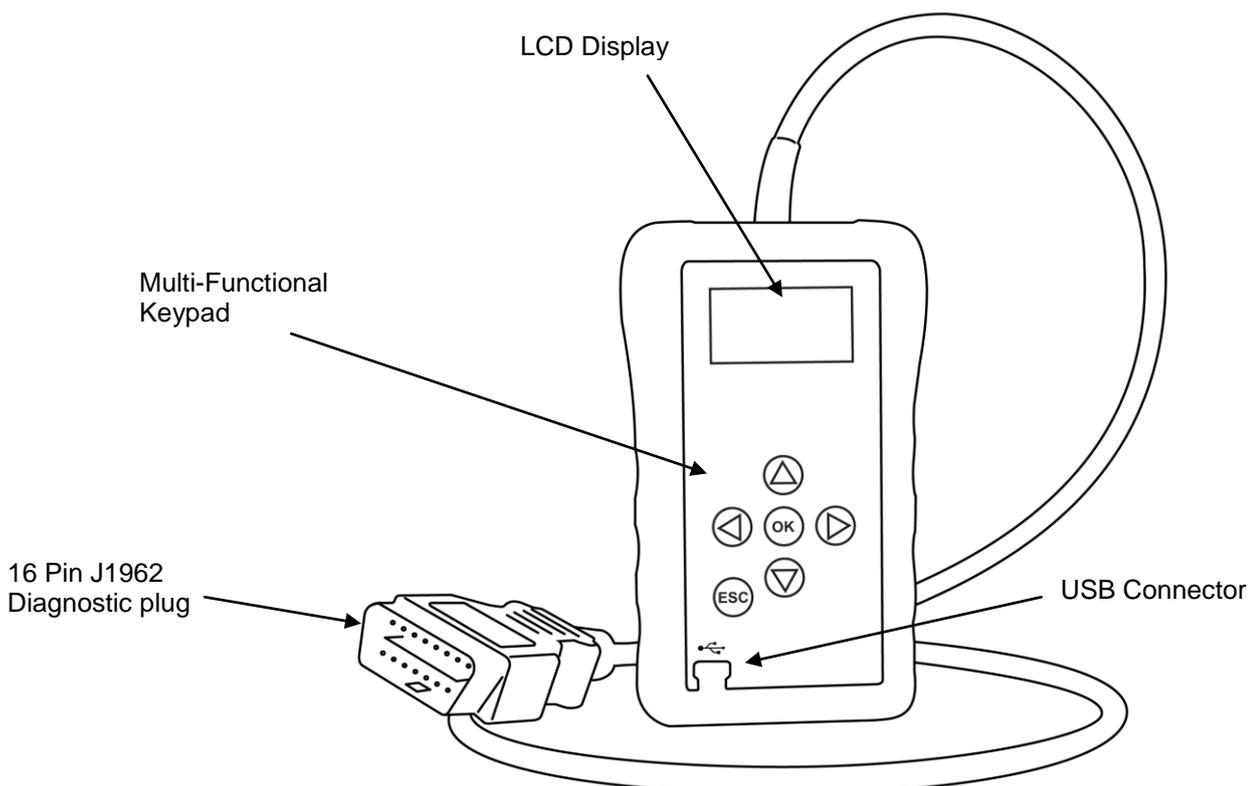

Safety Information

- Always wear eye protection when handling batteries.
- Keep batteries away from children.
- No smoking, avoid open flames or creating sparks near batteries.
- Explosion hazard. Batteries emit an explosive mixture of hydrogen and oxygen during and after charging.
- Corrosive hazard. Wear protective equipment to shield eyes, hands, and clothing
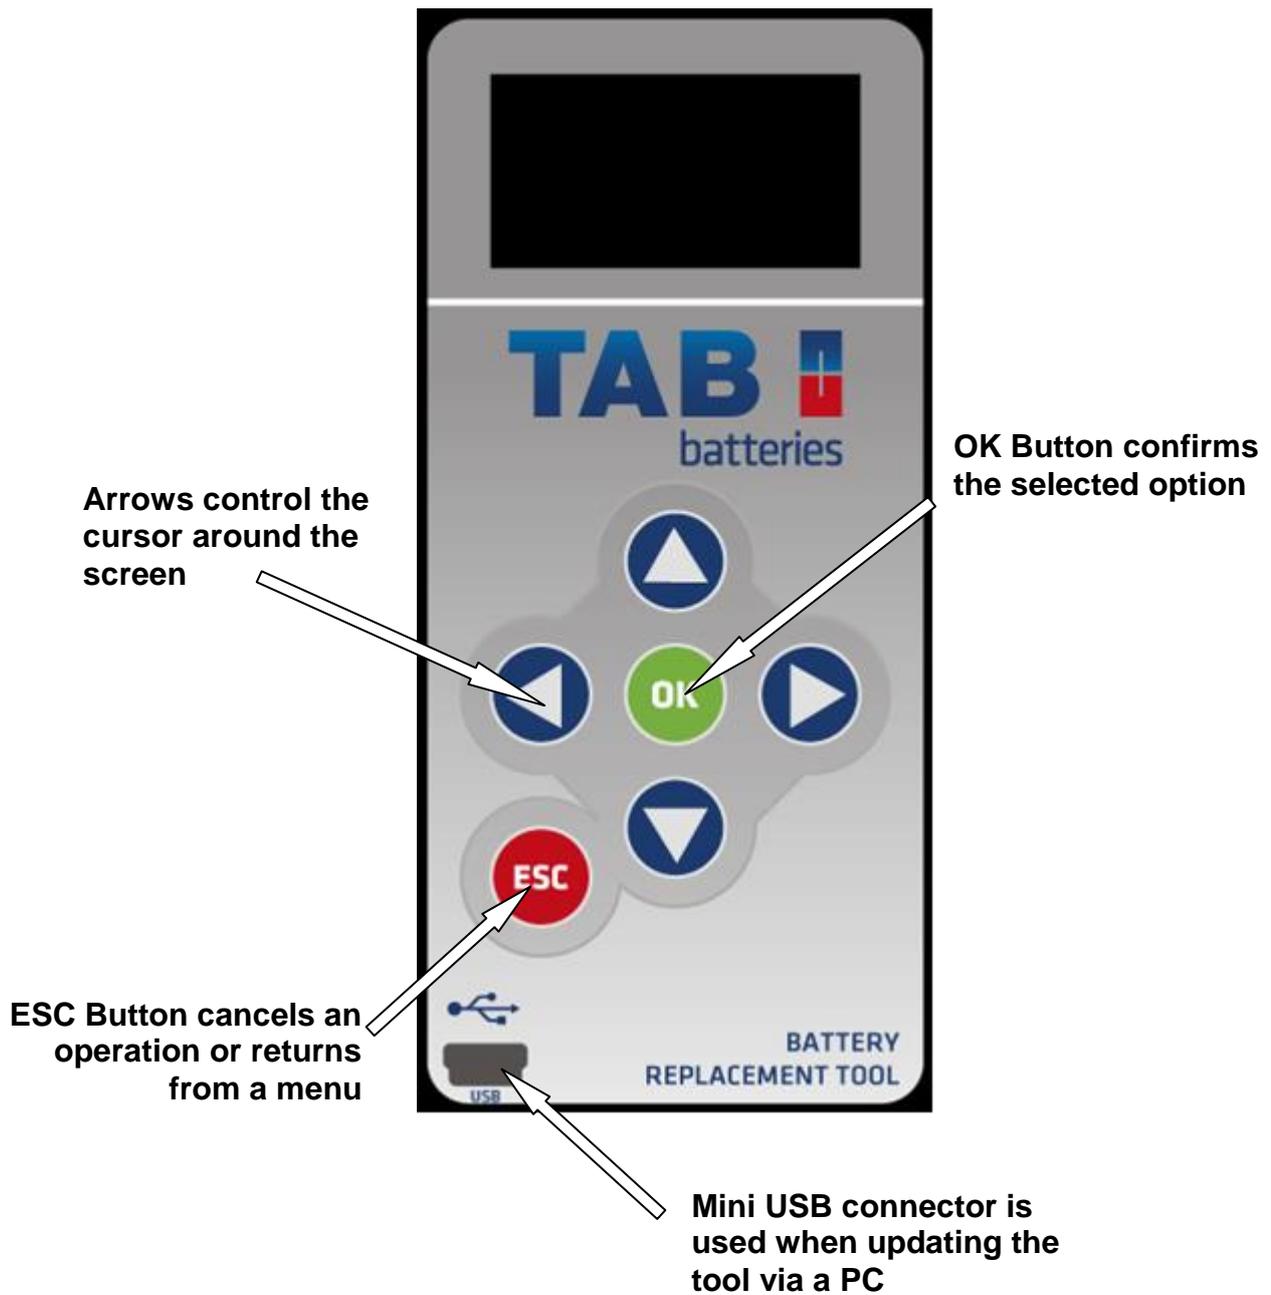

Product Details:

Modern battery management systems used in today's vehicles require their systems to be reconfigured each time a battery is fitted, the TAB Battery Replacement Tool allows you to reconfigure the stored battery data on these modern vehicles.

The TAB Battery Replacement Tool lets you enter the new battery information quickly and simply, it can also display the current battery's details.

Battery Replacement Tool Navigation:

OK Button confirms the selected option

Arrows control the cursor around the screen

ESC Button cancels an operation or returns from a menu

Mini USB connector is used when updating the tool via a PC

USER INTERFACE:

|	
	Navigation buttons • The arrow keys are used to navigate through the menus. • The OK button is used to confirm a selection. • The ESC button is used to go back to the previous screen.
	The mini USB connector is used to connect to a PC to allow you to update the tool with additional software.
	The J1962 connector needs to be connected to the vehicle's OBD socket in order to get power and make communications with the particular vehicle.

First Time Use

The Battery Replacement Tool must be registered and updated using the update suite, available to download from the TAB Battery Replacement Tool website: http://www.tab.si/index.php/dokumenti/display/31. Follow the on-screen instructions to complete the registration process.

	Ensure the battery is able to supply a minimum voltage (9V) to enable you to operate the tool. Ensure Ignition key is in the position "lock" Connect the **Battery Replacement Tool** using the 16 Pin diagnostic plug to any vehicle with a 16 Pin diagnostic socket. The tool will take you to the Main Menu screen. If you are coding this vehicle refer to the **Coding a Battery to a vehicle** section otherwise ensure the ignition is switched off on the vehicle and unplug the tool from the diagnostic socket.
